PROFESSIONAL SUMMARY

Backend Developer with hands-on experience in building scalable RESTful APIs using Node.js and Koa.js. Proficient in Microservices Architecture, JWT-based authentication, and real-time data processing using MQTT. Experienced in PostgreSQL and MongoDB with a strong focus on performance optimization, API security, and building efficient backend systems.

WORK EXPERIENCE

Associate Software Trainee – Rubus Digital Private Limited | Hyderabad Dec (2025)-March (2026)

- Contributed to **production-level microservices architecture**, building scalable backend services.
- Developed RESTful APIs for site creation module**, implementing dynamic business logic.
- Processed **payload-based requests containing site ID arrays**, dynamically fetching and returning corresponding site details.
- Analyzed **dashboard and landing page workflows** and ensured seamless API integration.
- Optimized API performance and database queries using **PostgreSQL and Knex.js**.
- Performed debugging and testing in **production environment**, ensuring reliability and performance.

Backend-Developer (Intern) – Rubus Digital Private Limited | Hyderabad Sep (2025) – Nov (2025)

- Developed **RESTful APIs using Node.js and Koa.js** following MVC architecture for scalable backend services.
- Implemented **CRUD operations using PostgreSQL with Knex.js**, ensuring efficient data handling and query optimization.
- Integrated **MQTT protocol** for real-time data communication and streaming from external clients/devices.
- Built service layers for real-time data processing and implemented JWT-based secure authentication.
- Built reusable **middleware for validation, authentication, and centralized error handling**.
- Implemented **delayed data processing and retrieval logic (5–10 minutes)** for controlled API responses.
- Tested APIs using **Postman** and ensured data consistency and proper error handling.

PROJECTS

Mern Stack Application- Portrait by Couple | Node.js | Express JS | MongoDB | React JS | Render | JWT | Postman

- Developed a full-stack web application for managing couple portraits with secure role-based authentication (Admin/User) using JWT and middleware.
- Built the frontend in React with dynamic UI for uploading, browsing, and managing photos.
- Designed backend APIs to support CRUD operations (add, view, update, delete) with access control based on user roles.
- Integrated MongoDB (Mongoose) for structured data storage and Cloudinary for optimized image upload and management, with testing done in Postman.

Todo List Node.js | Express JS | MongoDB | Postman

- Built a backend application to manage To-Do tasks with CRUD operations (Create, Read, Update, Delete).
- Implemented Mongoose schemas for task management with fields such as title, description, status, and timestamps.
- Integrated MongoDB for efficient data storage and retrieval.
- Tested all functionalities thoroughly using Postman to ensure accuracy of responses. Applied Node.js asynchronous programming and middleware concepts for smooth server operations.

TECHNICAL SKILLS

• Web Technologies	:	HTML, CSS, JavaScript
• Programming Languages	:	Python, JavaScript
• Backend Technologies	:	Node.js, Koa.js
• Database	:	MongoDB, PostgreSQL, Redis
• Framework / Libraries	:	React.js, Express.js, Bootstrap
• Develop Tools	:	GitHub, Postman, Visual Studio Code, PyCharm, Knex.js
• Message Streaming	:	MQTT
• Architecture & APIs	:	Microservices Architecture, REST API Development

EDUCATION

Electronic And Communication Engineering B-Tech	CGPA:7.32
B V Raju Institute and Technology Narsapur	2019 – 2023
